

# SAGOLA

## Mini XTREME

### SAGOLA updates its compact pressure spray gun Mini Xtreme Pressure

Now with internal air flow regulator. Even lighter, more compact, more ergonomic and more convenient.

**New body and improved ergonomics.** Due to its size, lightness and smooth trigger, it's perfect for the painting of pieces in a line production, where the trigger is continuously running and with difficult access to interior areas:

- Painting of plastics: bumpers, side-view mirrors, soft peel...
- Touch up lines and automobile factories' "hospitals".
- Structures and chassis not only for cars but also for industrial and agricultural machinery.
- Chair and wood furniture dyeing and varnishing.
- Leathery and footwear dyeing.

**SAGOLA Xtreme spraying system** in reduced size:

- New Mini VIT aircap, perfect for automobile line painting finishes.
- Mini HVLP aircap. Wide fan, perfect for colour, metallic paints and dyes on wood.
- Mini EPA. Low air consumption with a really high quality finish.
- Special versions MiniTech, with possibility of round jet for 0.6 and 1.0 nozzles.
- All aircaps are high transfer. 65 - 75%.
- Wide range of nozzle sizes: 0.6 - 0.8 - 1.0 - 1.2 - 1.4 - 1.6 mm.

**Maximum strength** (ideal for waterborne and corrosive products):

- Forged Aluminium Body.
- All the pieces in touch with the body are made of stainless steel.
- Product inlet, nozzle and needle in stainless steel.
