

Drying for waterborne products

Includes venturi regulator to adapt drying technique to the coated surface, retouched area or entire part. Achieves far superior performance than any other waterborne paints dryer. Can be fully dismantled to facilitate cleaning and proper maintenance (avoiding pollution).

- Reduction of drying time
- Greater volume of air output making possible the fast evaporation of water
- Exclusive Venturi regulator

TECHNICAL DETAILS

Weight: 580 g (1.28 lb)

Air Inlet: BSP 1/4" M

Working pressure: 3 - 6 bar

Application distance: 50 - 80 cm.

Sound level: 80 to 83 db

Up to 6,000 litres of air per minute

Air filter: 40 mesh (Stainless steel)

Air consumption: 300 - 600 L/min

Made in Spain by
Sagola S.A.U.
